CB ABOUT US

BESTDIVE has more than 20 years of experience in diving wetsuit development and manufacturing. Since the birth of our brand, BESTDIVE has gained wide recognition as an industry leader through professionalism, dedication, and attention to details in product design. Our strengths include domestic location, state-of-the-art technology, specialized assembly line, short lead time and high production capability. Our meticulously-made products speak for a high-level of diligence, perseverance, and integrity in our craftmanship.

All BESTDIVE products are made of 100% Yamamoto neoprene, the top-of-the-line material from Japan. To date, we have been awarded an exclusive license in China by Yamamoto, as well as global endorsement from freediving champion Jessea Lu.Excellence in comfort, thermal protection, and a large variety of styles are among the top characteristics of our products loved by many diving enthusiasts.Furthermore, at BESTDIVE, we act pragmatically, emphasize credibility, and take social responsibility seriously. Our efforts have been recognized by a number of highly respected individuals and organizations including world champion freediver Jessea Lu, China Underwater Association, PADI, diving sports federations at Peking University and Tsinghua University, ADEX, DRT and several 5-star dive centers. We have established in-depth cooperation with event/competition organizers in Asia and beyond (e.g. World Championship, Asia Cup, Military World Games, etc). In September 2017, BESTDIVE co-hosted the first Chinese freediving depth competition (BESTDIVE China Cup) on Panglao Island, Philippines. The event made wide and far-reaching impact.Many actors and actresses choose to wear BESTDIVE wetsuits during underwater movie production in more and more popular diving TV series (i.e. Flying Boy, Forensic Soul).In 2019, BESTDIVE sponsored the National Freediving Championship, National Finswimming Championship, and National Underwater Hockey Championship hosted by the Chinese General Administration of Sport. These events received unanimous and high praise from representatives of the diving industry. BESTDIVE has been awarded the title of "Most Popular Domestic Brand" by ADEX.

BESTDIVE TODAY

20 years of manufacturing experience YAMAMOTO exclusive license in China World champion Jessea Lu as global ambassador 80% of diving professional's trusted brand in Asia

We specialize in cutting-edge customization We excel in products made for ALL body types We have the largest color & style selection We have consistent, significant growth in sales

Sponsor of top athletes in World Championships Sponsor of multiple freediving Asian Cups Co-host of the Chinese National Freediving Cup Sponsor of diving education for college students

BESTDIVE brand ambassador: Jessea Lu

Born in Changzhou, China, Jessea graduated from Peking University and received full scholarship to study in the United States where she obtained a Ph.D degree in Pharmacology. During her time in the USA, she fell in love with diving and moved to Hawaii for regular skill practice in the ocean. In 2015, she took part in her 1st freediving competition and claimed the title of national champion. To date, Jessea has achieved 1 World Record, 4 Continental Records and 30+ National Records, and won more than a dozen Gold Medals in world-class competitions. She wears BESTDIVE for training, competition, and teaching students. She is also active in movie filming and conservations projects. Jessea said, "When holding my breath to challenge my limits, every drop of oxygen is precious. BESTDIVE wetsuit is like my second skin that helps save my energy in the water".

Ten highlights of BESTDIVE

3D Cutting 1

BESTDIVE offers an unprecedented 48 stock-size wetsuits, male and female sizes combined. These wetsuits are collectively designed by a number of tailors who have 15+ years of experience, using data collected from more than1000 Global on body measurements. We are proud of our 3D ergonomic cutting, personalized design and tailor-made services. We have everything you need in a wetsuit to fit, outline and care for your body.

2

Eco-friendly and Comfortable Material

BESTDIVE use 100% YAMAMOTO neoprene from Japan, which is derived from limestone and is over 99.7% calcium carbonate compared to petroleum based neoprene manufactured by other companies. Our materials are as environmentally friendly as possible - not just in its makeup but mostly in the production technique - using calcium carbonate foam is much cleaner, odor-free and more eco-friendly. YAMAMOTO neoprene contains up to 93% of closed cells, which is 22-23% higher than the industry average. As a result, our products feel soft to the touch and extremely comfortable around the body.

100% Yamamoto high-grade neoprene

BES

BESTDIVE wetsuits come in a variety of shinny colors that not only make suits look beautiful but also provide better Thermal performance. The secret is the titanium-containing SCS coating developed by YAMAMOTO. Titanium-containing material is widely used in aviation, medical and sport equipment. Its special physical function greatly enhances thermal insulation of marine suits by 40%. Therefore, our products with SCS coating are thinner and lighter – easier to carry, transport, and more suitable for sport performance.

3 Cutting-edge Thermal Protection with Titanium Technology

The surface of SCS material is shinny and super-slick. While movement of human skin in the water brings about quite a bit of resistance, SCS wetsuits bring such resistance down to almost zero. This characteristic of our wetsuits is the reason that almost all competitive freedivers who wear our products choose SCS material. In addition, SCS material has quick-dry and wind-proof advantages.

S.C.S. Super Composite Skin

Titanium Alpha

SCS: Super Composite Skin Excellent warmth, super elastic, low resistance

SCS is an extremely revolutionary material that is applied by advanced nanotechnology as a coating/layer over the surface of independent closed cell neoprene. The micelle structure on the rubber surface repels water when in contact with air, and reduces the surface resistance when in contact water. Tested by Japanese research institutes, the coefficient of surface resistance is under 1/10 of conventional smooth skin in the dry and 1/100 in the wet. This super low resistance of SCS gives marine suits many function advantages.

Titanium-Alpha technology makes ultra-light wetsuit possible

All of YAMAMOTO's materials with SCS coating contain an unique element from aerospace engineering – titanium, which provides a 40% increase in thermal insulation compared to conventional neoprene. Therefore, we can reduce the thickness of the rubber while ensuring the same warmth effect, thereby reducing the volume and weight of the diving suit. For example, a 3mm SCS wetsuit can replace a conventional 5mm wetsuit, decreasing the thickness and weight of the suit by 40% - cut off luggage overweight! Ultimately, we further reduce the need for heavy diving weights when diving!

4

Ultra-Smooth Surface Minimizes Resistance

Unmatched Metallic and Fabric Color Selections 5

Bestdive has the highest number of color sections licensed by Yamamoto in the world. We offer 11 unique metallic color options and 30 distinct nylon color options. Our costumers can choose completely different from ordinary textile fabrics. The available multi-color combinations and effects are limitless. When placed underwater or captured by a camera lens, wetsuits with metallic colors are truly dazzling and gorgeous.

Numerous Styles and Designs

71% of the earth's surface area is ocean. Human beings have been exploring the ocean more and more. Only with a better understanding can we have a better understanding of how to protect and exploit the ocean. Different sea has different scenery, biology, water temperature, and climate. You may need to choose a different style of diving suit in different waters or different seasons. You may even choose different styles and colors of diving suits when you dive with different people. Through 20+ years of professional experience in manufacturing diving suits, BESTDIVE designers present a wide range of products, diversified by function, water temperature and artistic effects. From scuba diving to spearfishing, from tropical water to polar seas, from recreational photography to sport competition, from high-durable purpose to the extreme comfort of personal leisure, we are able to meet every diver's need. We also provide special wetsuit designs such as instructor/coach outfit, team uniform, couple's pairing, and performance costume. Furthermore, if you supply your own design illustration or logo, we can custom-make products to your desire.

Purely Handmade with Twenty Years of Experience

Our factory was established more than 20 years ago. Today, we have many workers who have been on the production line for more than 10 years - each of them is a highly skilled craftsman. Thanks to our loval and diligent talents, BESTDIVE can make wetsuits as thin as 0.5mm, and as thick as 11mm. These results are unpreceded in history. Each wetsuit is made of dozens of neoprene cuts that, piece by piece, precisely brushed, bonded and sewed together by our experienced workers. The printing on the diving suit is a traditional pure manual scraping process made by experienced skillful hands including size mixing, color mixing, and scraping. They are passionate in the pursuit of perfection in craftsmanship and achieving impeccable details. All products are examined by highly-qualified inspectors and confirmed to meet the quality standards 100% before they are shipped to our customer.

\bigcirc Craftsman Concentration

Timely and Effective Customer Service

Diving suit is a professional diving equipment, in addition to the quality of the product, thoughtful, efficient and professional services are also particularly important. BESTDIVE is an innovative company. We are the first diving equipment company to launch the professional "4S" commitment: Sales, Spare part, Service, and Survey. At BESTDIVE, your purchased wetsuits can continue to receive professional maintenance, repair, size alteration, full customization, trade-in upgrade, etc. We can "fuel" your diving outfit, adding a refreshing look to your dive journey.

BESTDIVE's own production factory has large-scale production and fast turn-around time. With a team of creative and hard-working employees, our delivery time from-order-to-shipment has sped up to about 15 to 20 days (stock-size); 30 days (tailor-made), sometimes even shorter. No more worries about planning for suit purchase months in advance or delay in the process - we can deliver shortly before your trip!

9

Endorsement from Freediving World Champion

Our global ambassador Jessea Lu has been using BESTDIVE products in training, competition, and teaching students since she become a professional athlete. In January 2017, Jessea successfully completed a number of dives in the extremely harsh environment of Antarctic where seawater is at -2C degree. In June 2019, she became the first person to break a freediving World Record in Chinese history. Jessea ranked NO. 1 in the world for female overall points on the official AIDA athlete board during 2019-2020.

Jessea said, "When holding my breath to challenge my limits, every drop of oxygen is precious. BESTDIVE wetsuit like my second skin that helps save my energy in the water".

Domestic and World Renowned Reputation

BESTDIVE is recognized by a number of highly respected organizations including the China Underwater Association, PADI, diving sports federations at Peking University and Tsinghua University, ADEX, DRT and several 5-star dive centers. In 2018, BESTDIVE received an award from ADEX as the "Most Popular Domestic Brand". Worldwide, top level athletes, including Jessea, William, Stefan, Julia, JP, Sandou, ENZO, etc., wear BESTDIVE wetsuits. Many actors and actresses, including Jing Wu, Muqi Miya, Xuedong Chen, Hanchen Pang, etc., choose to wear BESTDIVE wetsuits during underwater movie production (i.e. The Listener, The Eyas, Explore With The Note). We are partners with several diving institutions and competition/event organizers. In Chinese National Championships, World Championships, Asia Cup, Military World Games and many other diving competitions around the world, a large number of athletes currently use our products.
